

SG3045: Sociology of Race and Racism

[View Online](#)

This module seeks to provide an overview of key issues in the sociological study of race and racism, and how these have been taken forward in contemporary debates. It begins by exploring the changing historical meanings of race and racism, the context within which debates about race and racism became part of wider social and academic discourses. It then looks at the ways in which questions about race and racism have had an impact on social and political relations in Britain. In relation to a number of contemporary debates, it also addresses how race and racism are intertwined with the state, migration and asylum, the war on terror, riots, rights and multiculturalism. It concludes by exploring the question of how societies can develop social and political agendas to tackle racism and potentially move beyond race.
